Creating a New Remote Repository

1. Go to "https://github.com/your_github_id"

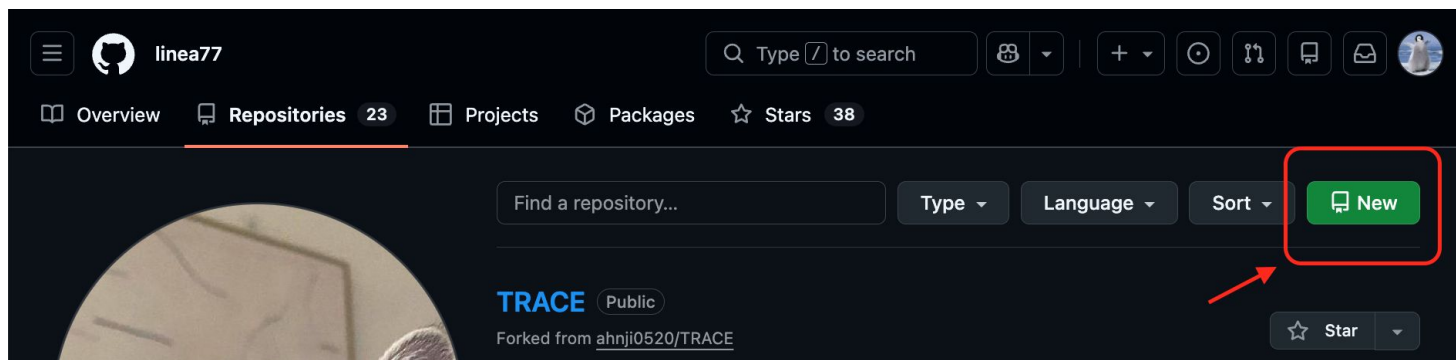

Creating a New Remote Repository

1. Go to the "Repositories" tab

2. Click the green 'New' button.

Creating a New Remote Repository

1. Enter "20262R0136CSAI20201" as the repository name.

Year (2026) + Semester (2R) + Campus Code (0136)
+ Course Code (CSAI202) + Course Section (01)

2. Set the visibility to "Public."
3. Click the green "Create repository" button.

The screenshot shows the GitHub 'New repository' page. The page is titled 'New repository' and has a search bar at the top. Below the title, there is a section 'Create a new repository' with a description: 'Repositories contain a project's files and version history. Have a project elsewhere? [Import a repository.](#) Required fields are marked with an asterisk (*).' The page is divided into two main sections: '1 General' and '2 Configuration'. In the 'General' section, the 'Owner' is 'linea77' and the 'Repository name' is '20262R0136CSAI20201'. A green checkmark indicates that the name is available. The 'Description' field is empty. In the 'Configuration' section, the 'Choose visibility' dropdown is set to 'Public'. Below this, there are options for 'Add README', 'Add .gitignore', and 'Add license', all of which are currently set to 'No' or 'Off'. At the bottom right, there is a green 'Create repository' button.

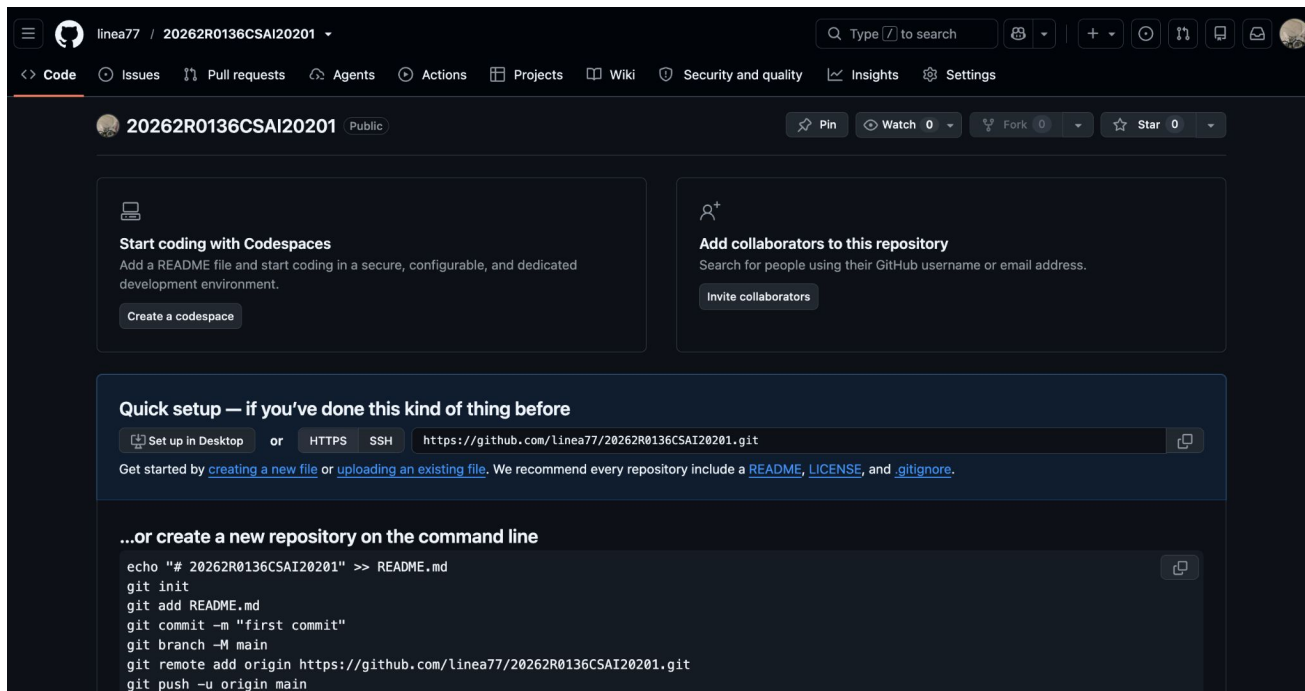

1. Repository name: 20262R0136CSAI20201

2. Choose visibility: Public

3. Create repository
